

I'm OK - Activity Monitoring

Know they are OK without having to Call them

How it Works

sends text message or email notifications that offer reassurance throughout the day and timely alerts when changes in activity could be cause for concern.

Daily rituals, such as making coffee in the morning or watching a favorite television show before bedtime, serve as a way to check-in. These actions signal that everything is okay, even when it's not possible to call or drop by. I'm OK provides peace of mind to both those who live alone (or who need extra support) and to the people who care about them. This system detects when movement is made, which enables you to detect variances in your loved ones daily routines before it turns into horrible crisis. Simply attach the sensors to commonly used items. The sensors send wireless signals to the receiver which is plugged into your internet router. You will be notified as the sensors are used or not used during periods of time you specify sending reassurance throughout the day. This system provides peace of mind with no monthly expense.

The universal monitoring solution

A family of incredibly smart sensors that you can set to monitor whatever you care about.

It is like having tens of devices in just one elegant solution.

Wireless sensors send signals to the receiver unit.

The receiver is connected by a cable into your internet router.

An app is available for Apple and Android to monitor all activity

Item # atsok1

Features List:

- I'm OK sends notifications that offer reassurance throughout the day and timely alerts when changes in activity could be cause for concern
- - I'm OK detects when appliances are switched on and off and sends information to the network
- - Depending on your preference, I'm OK will send a notification when appliance is used or not used within a specific period of time
- - Set up in Minutes Simply attach and setup the sensor pattern and you are ready to go
- - I'm OK includes four initial sensors - you can add more if you want. A total of 24 sensors can be added.

Easy setup in 5 minutes

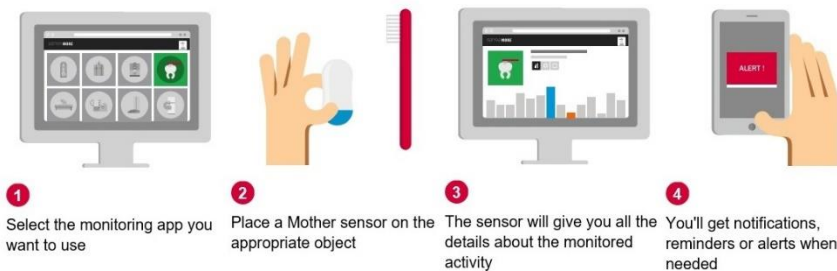

the magical Sensors

Small and slick they can be affixed to almost anything. Using Smart Motion Technology™ they detect and analyze the specific movements of every activity. They can also measure temperature and detect the presence of people or objects at a defined location.

Make any household object smart

Examples of uses:

- I want to know ANYTIME the bathroom door is opened
- I want to know the FIRST time the microwave is used each day
- I want to know if the coffee pot is NOT used between 7am and 10am

and many others.
