Unlike anything else currently available the Locator's audio and visual cues from the handheld point you in the right direction and will guide you to the exact location of the missing Tag / item whether it's stuffed down the back of the sofa or left behind in a shop. It will literally take you minutes (even seconds) to find things that would normally have you hunting around for hours and maybe never found at all.

With amazing accuracy, you will be guided to within an inch whether you are indoors or out, in complete darkness or in a noisy room.

To find your item, turn around in a full circle then walk in the direction of the strongest signal shown on the handheld – It's as easy as that!!!
