**Only \$189.99** + Sales Tax /Shipping  
\*Price subject to change without notice

**Item # atswcs30**

**30 day return  
1 year Manufacturer Warranty**

*Are you providing care in a group home, assisted living facility or a small residential facility?*

This **TOTALLY WIRELESS CALL SYSTEM** allows you to keep up with up to 30 patients. It is wireless with no cables to run. You know which call button was pressed on the pager and is shown on a Central Monitor Station. It is a great solution for the smaller facilities or homes with just a few people to monitor. Great for the “more than 1 but less than 100” situations.

This top of the line wireless alert device sends signals instantly to the 30 Patient Call Station. The Call Monitor tells you, both visually and audibly, which patient needs help so you can respond without delay. The alerts are loud and clear. This system is not meant to replace good care giving practices such as direct supervision or proper staffing but simply to alert staff in case of emergency or need.

**The basic package includes:** (1) Central Monitor with AC Adapter - (3) Call Buttons - (1) Pager Style Receiver with Display

### **Central Monitor (1 included)**

Each wireless alert device is assigned a number on the monitor's display. When a call button is pressed, a verbal or musical alarm (selected by caregiver) will play and the corresponding number will light up on display. The Central Monitor receives signals from up to 150 feet away. Please check the range in your facility as different types of building material (concrete, brick, etc.) can slightly affect the range. Choose from 14 alarm languages / melodies. If you choose to run on batteries, it has a low battery indicator.

### **Nurse Call Button / Pendant (3 included)**

The call button can be worn like a pendant using the included lanyard or can be mounted on a bed or nightstand using included adhesive tape. The button requires only slight pressure to activate. After sending a signal, the Call Button can only be reset from the Central Monitor.

### **Pager (1 included)**

When the Central Monitor receives a signal, it sends a signal to the pager. The pager receives signals up to 150 feet from the Call Station. The pager shows a visual alert number on the LCD screen and provides a verbal announcement which has an adjustable volume, choice of 11 languages or 3 musical tones. The beeper style clip-on pager is easy to wear on the waist. It also has a stand on the back for tabletop use.

### **Other Accessories:**

Additional Pager or Call Buttons – Alert Pad for Chairs – Alert Pad for Bed – Motion Sensor (see website for more information)
